ROOTS

Blues has its origins in the African music that the first slaves transplanted to the southern United States, where each tribal group steadfastly retained its own linguistic and musical traditions. Though, as a musical form, blues did not exist during the more than 200 years of American slavery, during this time there was a blending of innumerable kinds of music. Black musicians were playing everything from purely African music to purely white American music. Despite the borrowing that went on musically between the races, the black performing style remained distinctive, with black songsters developing a body of music radically different from the white and interracial common stock. It wasn't until the 1890s that blues developed as a musical genre.

THE BLUES NOTES

Blues was heavily influenced by field hollers and work songs. These melodies sound like they are based on the major scale with the flattening in pitch around the 3rd, 5th and 7th. The flatted 3rd is the expressive core of the hollers, work songs, spirituals and, later, the blues. Blues became a more formalized music than hollers and work songs in the late 19th century, with a tendency toward 12-bar, AAA- or AAB-verse forms, or pentatonic melodies with a flatted 3rd.

SOUTHERN DIVERSITY

Early southeastern blues was more of a ballad or rag-time nature, while in east Texas the guitar-accompanied blues tended to be rhythmically diffuse with elaborate melodic flourishes to answer vocal lines. At the same time, a black piano tradition that emphasized driving dance rhythms was materializing in the lumber and turpentine camps of Texas and Louisiana. Veterans of these work camps and barrelhouses were Memphis Slim, Jack Dupree, Little Brother Montgomery, Roosevelt Sykes, Sunnyland Slim and Speckled Red.

THE RHYTHMIC ELEMENT

The blues piano tradition really began as a mocking of railroad train sounds—a rhythmic bass with the intent of capturing the pattern of rail clicks was one of the first things all players learned as children. The pianist's job was to keep the people dancing; boogie-woogie probably developed out of this kind of playing, transforming the piano into a polyrhythmic railroad train. The left hand hammered out eight insistent beats to the bar while the right hand played melodies that were essentially rhythmic variations on the bass line. As dance halls grew bigger, pianos and small combos began replacing the lone guitarist, as boogie-woogie on the upright—with the front out and buzzers on the strings—could reach to the back tables in a big, noisy barroom.

URBAN BLUES

As the piano, an orchestra in miniature, can also be a drum, Delta blues piano accompaniments were more percussive and hypnotic than boogie-woogie; here, "crushing the ivories" far superseded "tickling the ivories." The black migration northward at the end of the century helped spread this new style to the cities, and players like Otis Spann, Sunnyland Slim and Memphis Slim brought their Delta blues piano style to Chicago.

THE MODERN BLUES ERA

Blues piano exploded during the Second World War years. In the 1940s "jump blues" was the rage, with innovators such as jazz legend Count Basie leading the way. In New Orleans, Professor Longhair was introducing Latin and rumba figures, full of polyrhythms, to his basic blues piano. He is considered the "Father of New Orleans R & B," and his influence can be heard in the music of Dr. John and Allen Toussaint, among others. In St. Louis during the 1950s, Johnny Johnson played a crucial part in Chuck Berry's pioneering rock 'n' roll sound, and continues to record and perform his St. Louis-style blues today. Ray Charles, another star of the blues firmament in the '50s and '60s, fused gospel and blues to create a style that has influenced all modern soul music. Regardless of style, it is nearly impossible to listen to contemporary pianists and not hear the profound influence of the blues legacy.

I N T R O D U C T I O N

Following is a musical outline or map of the 12-bar blues. Most of the licks, comping figures, turnarounds and tags will fit comfortably in this framework. Whenever you play the blues, it is essential to always know where you are in the arrangement.

12-Bar Blues

A musical staff in 4/4 time, consisting of a grand staff with treble and bass clefs. The staff is divided into four measures. The first measure is boxed and contains the Roman numeral 'I'. The second measure contains 'IV'. The third measure contains 'I'. The fourth measure is shaded and contains 'I'.

A musical staff in 4/4 time, consisting of a grand staff with treble and bass clefs. The staff is divided into four measures. The first measure is boxed and contains the Roman numeral 'IV'. The second measure contains 'IV'. The third measure contains 'I'. The fourth measure is shaded and contains 'I'.

A musical staff in 4/4 time, consisting of a grand staff with treble and bass clefs. The staff is divided into four measures. The first measure is boxed and contains the Roman numeral 'V'. The second measure is shaded and contains 'IV'. The third measure is boxed and contains 'I'. The fourth measure is shaded and contains 'V'.

STRUCTURE This is one of the most common arrangements of a 12-bar blues. The boxed measures indicate the structure. All chords include the minor 7ths. In the key of C, the chords are C7, F7, and G7.

FILLS The measures shaded in are where the fills go. By definition, a fill is a change of texture. On the piano, we have several ways of changing the texture: a right-hand melodic lick, left-hand bass line, rhythmic change between the left and right hand, changing octaves, and any combination of the above. The biggest fill occurs in measure 10.

The Pentatonic Scale

The pentatonic scale is used extensively in the blues. This is a five-tone scale that is comprised of scale steps 1, 2, 3, 5 and 6 from the diatonic major scale. Passing tones are added between scale steps 2-3, and 5-6.

1 fingering: 2 3 4 1 2 3 1 2

scale degrees: 1 2 3 5 6 (8)

Pentatonic Exercise

Pentatonic exercise is one way of grouping the notes of the scale for solos and fills. Included are two variations of the exercise; Variation #2 includes the two passing tones. Slide the third finger—do not pull your hand.

2 C Variation #1 Variation #2

5 2 3 2 1 5 2 3 2 1 5 2 3 3 2 3 2 1 5 2 3 3 2 3 2 1

Suspensions

Suspensions are a common way to create movement without going anywhere, and are a great way of killing time while playing one chord. The different suspensions include the sus4, sus2, sus4/sus2, and the full suspension, which is the same as the 2nd-inversion IV chord.

3 C Csus4 Csus2 C^{sus4}/_{sus2} F/C

12-Bar Blues

This is a common arrangement of a 12-bar blues. Note how the chord voicing is split between the two hands; movement is between the inner voices. This should be practiced with both a triplet- and eighth-note feel. The second and fourth chord in every measure is a full suspension. Bar 1: C, F/C, C7, F/C.

4

Triplet feel (♩ = $\overset{\frown}{\text{♩}} \overset{\frown}{\text{♩}} \overset{\frown}{\text{♩}}$)

Chord progression: C, F, C, F, F, C, C, F, G, F, C, G.

Sliding Notes And Crushing Notes

Sliding notes and crushing notes allow the piano player to get to the flatted 3rds and flatted 5ths, which are an integral part of the blues sound. Make sure that the grace note being crushed is released while holding the other note. Slides and crushes can be played at various speeds.

5

Triplet feel (♩ = $\overset{r}{\overset{3}{\underset{7}{\text{♩}}}}$)

C F/C C7 F/C F B♭/F F7 B♭/F

5 2 1 5 2 1 *slide* 3 3 2 5 2 1 5 2 1 5 2 1 5 3 1 5 2 1

Now incorporate the \flat 3rd and \flat 5th into the previous example. Sometimes you have the option of sliding or crushing the \flat 5th. Slides and crushes produce different phrasing. Try both, and practice this in all keys.

Neighbor Chords

Another common way to create movement while comping is to approach chords from both a half-step above and a half-step below. Suspended chords also work well here as they add to the movement.

6

Triplet feel (♩ = $\overset{r}{\overset{3}{\underset{7}{\text{♩}}}}$)

G7

Detailed description: This system concludes the piano accompaniment. The right hand (treble clef) plays chords in the C7, G7, and D7 positions, with fingerings 4-2-1, 5-3-1, and 4-3-2-1. The left hand (bass clef) continues with the eighth-note bass line. The key signature has one sharp (F#).

Altered Notes

Here is a common use of the flatted 3rd, flatted 5th, 7th and the full suspension (Db/Ab). Make sure you hold the quarter note in the right hand for the full beat. Check the fingering!

7

Triplet feel (♩ = $\overset{r}{\underset{3}{\text{♩}}}$)

Ab Db/Ab Ab7 Db/Ab Db Gb/Db Db7 Gb/D

Running Triplets

This is a variation of #7. It gets you to play two different phrases in your right hand at the same time. Instead of anchoring your hand down with one finger holding the quarter note, you must slide the bottom note while repeating the top note.

8

Triplet feel (♩ = $\overset{r}{\underset{3}{\text{♩}}}$)

G

C

D

5 5 1 5 1 5 5 5 1 5 1 5
2 3 3 3 3 3 3 3 3 3 3 3

Musical notation for the D chord exercise. The piece is in G major (one sharp) and 4/4 time. The right hand features a sequence of eighth-note triplets, with the first two notes of each triplet being beamed together. The left hand provides a steady accompaniment of eighth-note chords. The exercise is divided into two measures, each containing four triplets.

G

Musical notation for the G chord exercise. The piece is in G major (one sharp) and 4/4 time. The right hand features a sequence of eighth-note triplets, with the first two notes of each triplet being beamed together. The left hand provides a steady accompaniment of eighth-note chords. The exercise is divided into two measures, each containing four triplets.

Jimmy Yancey–Type Parallel 3rds

Jimmy Yancey, a well known Chicago pianist, plays this well-known riff using the flatted 3rd, flatted 5th and the full suspension (F/C). Notice the movement of parallel 3rds.

9

Triplet feel (♩ = $\overset{\frown}{\text{♩}} \overset{\frown}{\text{♩}} \overset{\frown}{\text{♩}}$)

C

3 4 3 3 3
2 1 2 2 2 1 2

Jimmy Yancey–Type Parallel 6ths

Here is a variation of the previous figure. Inverting the parallel 3rds creates parallel 6ths. The 4th connects the 5th and the 3rd.

10

Triplet feel (♩ = $\overset{\frown}{\text{♩}} \overset{\frown}{\text{♩}} \overset{\frown}{\text{♩}}$)

C

4 5 4 5 5 4
1 1 3 1 1 1 1 3 3 3 2 1 2

Jimmy Yancey-Type Boogie

This is the kind of early boogie-woogie Jimmy Yancey would play. It employs great use of the flat 3rd and flat 5th sliding as parallel 3rds to the 3rd and 5th. To create a solo, start with a simple riff and repeat it, building as you go along. This is the same left-hand part that Professor Longhair used for his hit song "Tipitina."

11

Triplet feel (♩ = $\overset{r}{\underset{3}{\text{♩}}}$)

C

3 4 4 4
1 2 2 2

First system of musical notation for the C chord. The right hand features a triplet of eighth notes in the first measure, followed by a quarter note and a quarter rest. The left hand plays a steady eighth-note bass line. The key signature has one flat (Bb).

F

Second system of musical notation for the F chord. The right hand continues the triplet pattern. The left hand bass line remains consistent. The key signature has two flats (Bb, Eb).

C

G

Third system of musical notation, transitioning from C to G. The right hand triplet pattern continues. The left hand bass line changes in the third measure to accommodate the G chord. The key signature has two flats (Bb, Eb).

C

5 3 2

1

1

3

2

1

3

5 3 2

3

2

1

C

5 3 2

1

Fourth system of musical notation, returning to the C chord. The right hand features a triplet of eighth notes with fingerings 1, 3, 2. The left hand bass line continues. The key signature has one flat (Bb).

Boogie-Woogie Walking Bass

Another variation is to play the octave. This is the kind of riff you hear Dr. John play over the I chord. Count straight 16ths.

12

Musical notation for exercise 12, titled "Boogie-Woogie Walking Bass". It consists of two staves: a treble clef staff and a bass clef staff. The treble staff features a series of chords, each with a "5 3" fingering above it. The bass staff features a walking bass line with eighth notes. The key signature has one flat (B-flat), and the time signature is 4/4. The exercise is marked with a "C" for C major.

Huey Smith-Type Riff

This lick is the kind of figure Professor Longhair and Huey Smith played a lot. A and B are variations of the original riff. Notice the different ways the beat is being split up. Count straight eighths.

13

Musical notation for exercise 13, titled "Huey Smith-Type Riff". It consists of two staves: a treble clef staff and a bass clef staff. The treble staff shows three variations of a riff, labeled 13a) and 13b). Each variation has a "C" above it. The bass staff shows a walking bass line with eighth notes. The key signature has one flat (B-flat), and the time signature is 4/4. The exercise is marked with a "C" for C major. Fingering numbers (1, 3, 5) are written above the notes in the treble staff. A triplet of eighth notes is indicated with a "3" and a bracket in the treble staff.

Ostinato Riff

This use of the flatted 3rd is common—no slide here. This line sounds great whether played over the I, IV, or V chord. Check out how the sus4, sus4/sus2 creates movement at the end of beats 1 and 3. Notice the voicing of the sus4/sus2.

14

Triplet feel (♩ = $\overset{\text{r}^3}{\underset{\text{7}}{\text{♩}}}$)

Musical notation for Ostinato Riff 14, featuring a triplet feel. The piece is in A major (two sharps). The first system shows the A and D chords. The second system shows the A chord and a descending triplet ending with a 2-5 interval. Fingerings are indicated by numbers 1-5 above the notes. The bass line consists of a steady eighth-note accompaniment.

Texas Boogie-Type Riff

Johnny Johnson and Dr. John use this riff often. The harmonic movement is C9, F/C, C7. This works well for both soloing and comping.

15

Triplet feel (♩ = $\overset{\text{r}^3}{\underset{\text{7}}{\text{♩}}}$)

Musical notation for Texas Boogie-Type Riff 15, featuring a triplet feel. The piece is in C major (no sharps or flats). The first system shows the C chord. The second system shows the C chord with a descending triplet ending with a 2-5 interval. Fingerings are indicated by numbers 1-5 above the notes. The bass line consists of a steady eighth-note accompaniment.

All Purpose Variation #1

Here is a variation of the previous lick that you may also hear Ray Charles play. Check out how the bass line harmonizes with the flat 5 and the 4th.

19

Triplet feel (♩ = $\frac{1}{3}$ ♩)

F 5 4 5 2 3 2 1 5 5 2 2 5
3 2 3 3 2 1 2 1 3 2

All Purpose Variation #2

This is a variation of the previous example, and is one more way Charles makes use of the pentatonic scale and full suspensions.

20

Triplet feel (♩ = $\frac{1}{3}$ ♩)

F 5 4 5 2 3 2 1 5 2 3 5
3 2 2 3 2 1 3 2 2 1

Bar-Line Break-Up

Notice how this phrase goes through the bar line; you do not feel the downbeat in the right hand. Roll the notes after you have learned the lick. This is the kind of line Johnny Johnson likes to play.

21

Triplet feel (♩ = $\frac{1}{3}$ ♩)

C 3 5 4 5 1 5 4 G 1 5 2 2 5
3 3 2 3 2 2 2 1 2 1 5

Turnaround #1

This is an often-used turnaround. Check the harmonic walk-up to the V chord. Augmenting the V chord (raising the 5th a half step) is common and works great in ballads and introductions.

22

Triplet feel (♩ = $\overset{r}{\text{♩}} \overset{3}{\text{♩}} \overset{7}{\text{♩}}$)

C C7 F F#°7 C/G Ab7 G7#5

5 3 2 1 5 4 3 1 5 4 2 1 5 3 2 1 5 3 2 1 5 3 2 1 5 3 2 1

Turnaround #2

Here is a variation of the previous turnaround. Willie Tee favors this version, which has more of a New Orleans feel to it.

23

Triplet feel (♩ = $\overset{r}{\text{♩}} \overset{3}{\text{♩}} \overset{7}{\text{♩}}$)

C C7/E F F#° G9

5 2 4 2 3 3 5 3 2 1 5 3 2 1

Turnaround #3

Below is another common turnaround: parallel 3rds walking down in the right hand while the left hand walks chromatically. All this movement is driving you to the I chord. The top note is a constant C.

24

Triplet feel (♩ = $\overset{r}{\text{♩}} \overset{3}{\text{♩}} \overset{7}{\text{♩}}$)

C C7/Bb A°7 Ab°7 C/G Ab7 G7

3 2 5 3 3 3 5 3 2 1 5 2 2 1 3 2 2 1 3 2 2 1

Pentatonic Turnaround #1

Dr. John is one of many New Orleans artists that uses this pentatonic turnaround. It is played with a straight eighth-note feel. Notice how the bass line walks you from the V chord to the I chord and back down to the V chord. The last measure has a nice New Orleans syncopated feel.

25

Musical score for Pentatonic Turnaround #1, featuring a piano accompaniment in B-flat major. The score is divided into two systems. The first system consists of two measures. The second system consists of four measures. The bass line in both systems walks from the V chord (Bb) to the I chord (F) and back down to the V chord (Bb). The final measure of the second system has a syncopated feel. The chord progression is: F, Bb, Bb7/Ab, Eb/G, Ebm/Gb, Bb/F, F.

Pentatonic Turnaround #2

This is the kind of variation Otis Spann would play on the previous turnaround.

26

Musical score for Pentatonic Turnaround #2, featuring a piano accompaniment in B-flat major. The score is divided into two systems. The first system consists of two measures. The second system consists of four measures. The bass line in both systems walks from the V chord (Bb) to the I chord (F) and back down to the V chord (Bb). The final measure of the second system has a syncopated feel. The chord progression is: Bb, F.

I-IV Walk-Up #2

'Fess liked to use this lick as well; it's a variation of the one above. The lick is broken up between the two hands, and you should feel more weight at the beginning of every three notes. Sounds great with a very syncopated feel.

29

C

2 3 2 1 1 3 2 2 2 2

F

5 3 3 1 2 4 1 3 2 1 4 2 1 2 3 2

C

Willie Tee-Type IV Approach

Willie Tee likes to approach the IV chord this way. Notice the chromatic chord on beat 2. This is similar to #7—approaching chords from a half step above and below.

Triplet feel (♩ = $\frac{1}{3}$ ♩)

C

2 3 1 3 5 3 1 2 1 3 2

5 3 2 1 5 4 3 2 5 5 4 3 3 2 2 1 1 1 1

F

5 2 1 5 2 5 3 1 1 1

IV Intro Walk-Up

Here is another common riff that is used as a walk-up to the IV chord, an introduction, and a solo. Ray Charles, Dr. John, and countless others use this riff. These notes are specific to the chord you are playing—in this case a C7.

31

C

Rolling Notes

Rolling notes, particularly 3rds, 6ths, octaves and 9ths, is a common way of ornamenting a lick. Here, I'm rolling 3rds and moving in parallel 3rds walking to and from all the chords. This technique imitates the tremolo of a stringed instrument.

32

Triplet feel (♩ = $\overset{r}{\underset{3}{\text{♩}}}$)

C

4 3 4 4 4 4 3 4
2 1 2 2 2 2 1 2

F

3 4 4 4 4 4 4 3 4 4 4 3
1 2 2 2 2 2 2 1 2 3 2 2 1

1 2 2 2 2 2 2

G 5 3 4 4 4 4 4 3

3 1 2 2 2 2 2 1

The first system of music consists of two staves. The treble staff begins with a C chord (C4, E4, G4) and a 4/2 time signature. It then transitions through a series of chords: C4 (F4, A4), C4 (G4, B4), C4 (A4, C5), C4 (B4, D5), C4 (C5, E5), C4 (D5, F5), and C4 (E5, G5). The bass staff provides a steady accompaniment with a sequence of chords: C4 (F2, A2), C4 (G2, B2), C4 (A2, C3), C4 (B2, D3), C4 (C3, E3), C4 (D3, F3), and C4 (E3, G3). Fingering numbers are provided above the notes in the treble staff.

F 4 3 4 4 5 4 4 3

2 1 2 2 3 2 2 1

C 4 3 4 4 4 4 4 3

2 1 2 2 2 2 2 1

G 2 3 4 4 4

1 1 2 2 2

The second system of music consists of two staves. The treble staff begins with an F chord (F4, A4, C5) and continues with a sequence of chords: F4 (G4, A4), F4 (B4, C5), F4 (C5, D5), F4 (D5, E5), F4 (E5, F5), F4 (F5, G5), F4 (G5, A5), and F4 (A5, B5). The bass staff provides a steady accompaniment with a sequence of chords: F4 (F2, A2), F4 (G2, B2), F4 (A2, C3), F4 (B2, D3), F4 (C3, E3), F4 (D3, F3), F4 (E3, G3), and F4 (F3, A3). Fingering numbers are provided above the notes in the treble staff.

Crushing And Sliding #1

This common blues riff is based around the flat 5. The top note is the 7th, which contributes to the intensity of the sound. This makes use of crushes and slides.

33

Triplet feel (♩ = $\overset{r}{\underset{3}{\text{♩}}}$)

G

Crushing And Sliding #2

This is a variation of the above riff and uses only the notes from the blues scale (1 ♭3 4 ♭5 5 ♭7).

34

Triplet feel (♩ = $\overset{r}{\underset{3}{\text{♩}}}$)

C

Stride Lick In 10ths

In this example, the left hand is playing 10ths in a stride style. The right hand is walking chromatically to the IV chord and switching to an F pentatonic scale over the IV chord. You can open up your solo by changing scales as the chords change.

35

Triplet feel (♩ = $\overset{r}{\underset{3}{\text{♩}}}$)

C

F

C

Left-Hand 10ths

Again, you are playing 10ths with the left hand. This time the 10ths are played together, and works well for slower tempos. The right hand plays straight pentatonic; beat 3 in measure 1 is a common pentatonic riff. Watch your fingering.

36

Triplet feel (♩ = ^{r3}♩)

C Dm D#°7 C/E F Gm G#°7 F/A

1 2 2 3 4 2 3 3 2 1 3 2 1 2 3 1 3 3 3 3 2 1 1 2 1 2 3

V-Chord Lick

A common use of this lick over the V chord. Allen Toussaint and Katie Webster use this kind of riff as both an intro and an approach to the turnaround.

37

Triplet feel (♩ = ^{r3}♩)

12-Bar Cow Cow Boogie-Woogie Variation

Here you have a full-length solo with an 8th-note feel, reminiscent of the "Cow-Cow Boogie," originated by Cow-Cow Davenport. The harmonic structure is a little different. The fill in bar 4 uses rhythm to change the texture, and employs suspensions for movement. I also switch to the F pentatonic scale (F G A C D) when playing the IV chord—to open up the solo—before returning to C pentatonic (C D E G A). Notice how some of these riffs basically outline the chord being played.

Detailed description: This system of musical notation consists of two staves. The treble clef staff begins with a G7 chord. The melody consists of quarter notes G4, A4, B4, and C5. A triplet of eighth notes (B4, A4, G4) is marked with a bracket and the number '3'. The bass clef staff provides a harmonic accompaniment with chords: G7, F7, E7, and D7, each represented by a triad of notes.
